

Ghassan Khalifa, Ph.D.

Dr. Ghassan Khalifa is an Information Technology Project Manager in the Communication and Information Technology Commission. His primary responsibilities include managing the Saudi Home Computing Initiative, a public-private partnership to increase the personal computer use in Saudi homes by one million new users. Dr. Khalifa specializes in Information Technology (IT) Evaluation in government and private sector and project management. Through empirical research in the United Kingdom, he investigated barriers restricting the application of investment appraisal techniques in the government of Wales, and his research findings were published in several international conferences.

Dr. Khalifa has a Ph.D. in Information Technology, an M.B.A. in Management and Finance, and a bachelor's degree in Applied Electrical Engineering. He also obtained his Project Management Professional certification from PMI.
